

## **Service**

My role has always been as a servant to the department. When I was hired, I received a job description stating that my consultation and teaching were specifically aimed to improve our graduate training in statistics, our ability to seek grants as a department, and to improve the caliber of the faculty publication profiles. This is something that all faculty do, but I uniquely had it as part of what I was to be evaluated for in regards to tenure in addition to the standard criterion. Over the last decade and a half (almost two) I have witnessed the department flourish. I like to think that I have been a contributing factor and continue to seek out ways that improve our entire department.
